Pioneers of Today

Pioneers of today
Risk their life
To have adventure,
Why this way?

In they go,
Tucked inside.
Nothing to hide,
side by side.

Survivors there were none,
I wish at least one.
They've gone away,
I wish they came back another day.

The sadness of death,
Not a breath.
People are sad.

They were brave,
So very, brave.

by
Melanie
Armstrong

The day Tuesday, January, the 28TH
of '86.
When the space-shuttle crashed
into.
The Atlantic Ocean.
All those sad children.
All those brave people.
Who risked their lives for
progress.
Will live in our memories.

Darlene Wright

The Explosion

Between 12:00 and 1:00 on Jan. 28, 1986,
The Challenger set off on a trip to space,
It had seven pioneers on the ship,
To take a great adventure as a trip,
A min. and 12 sec. went by,
Then a person saw some smoke in the sky,
He saw that the Challenger was on fire,
And went to tell somebody with great desire!
He told some people and spread the news,
There was a teacher on the ship,
She had two children 9 and 6,
The ship landed in the ocean,
With a great explosion,
There was much sorrow everywhere,
Because their dear ones were in the ship,
A little bit later they were dead,
But there would be ones,
Who would never forget them,
And this day will never be forgotten,
There will be much sorrow,
But this day will be special,
Even the people of tomorrow,
Will know this day.

Wendy Dupont

The Challenger

The Challenger sat ready to go
On the launch pad so and so
Those pioneers were in quite a maze
But a few hours later
They weren't in space
The terrible news would shock
with sorrow.
And they wouldn't be back
today or tomorrow.

Katherin Knapp

The Challenge

The teacher excited.
The crew excited.
She risked her life.
Breaking new ground.
After 1 min. and 12 sec. it blew up.
Another explosion happened.
The 3rd grade class and the
High School class were silent.

The Risk

There was a risk today -
There was dying
And crying
I didn't like it at all

The Pioneers

Golden pioneers
Through the clouds and the tears
Go from the sadness of the day
To the destiny of the Milky Way!

Travis
DeMaio

Todays Pioneers

The people aboard the Challanger that
That took off today
Risked thier lives to go into space
The shuttle flight which was portponed
3 days finally left Cape Canaveral
It had a 1 minute 12 second flight
Before it went down into the Atlantic
None of the crew survivied
I wish they had, but they are gone
Forever.
The shuttle will probably never fly
again

Michael Fleming

The pioneers of today
were born yesterday
They were very brave
to try to find what they craved
Breaking ground up in space
To all the spacemen
who died today
may we always remember them
in every way

Dawn LaSalle

The Challengers

That day was the worst.
When the shuttle fell to earth.
Seven passengers were in there.
Nine miles in the air.

by Steward Jennings

Pioneers

Shooting off into space,
They didn't make it there,
They were great pioneers,
Who risked there lives to find new places.
The Challenger blew-up, no sign of life
was left,
People were sad and still are, for they
never shall be seen again.

By.
Konni Cassady

The Challenger Tragedy

Between twelve and twelve thirty
A tragedy that was very dirty.
Seven passengers were in there
At nine miles it blew up in the air.

By Tommy B.

Pioneers

Pioneers, Pioneers take great risks
They come and they go
There are sad times and glad times
But today on January 28th, 1996
The seven pioneers on a trip to space
Up up and away
It was so sad
They went up But didn't come down
Death is poor..., sad..., and lonesome,
Although this does not mean bad,
Just sad.

Todays Pioneers

Those pioneers, they were brave,
They could not be saved.
The space shuttle had blown up,
They were brave as can be,
I wish they were saved.

Sheila Blanning

Pioneers The Great

Those pioneers who risked their life for others.
Cared for the country they lived in.
They wanted to show courage.
They thought of everybody and not just themselves.
Some pioneers lived through what they did and some died.
It's a sad time when they die.
But it's a happy time when they lived.

Christina Coursey

Today's Pioneers

The people of today,
Are remembered everyday.
The flight turned out to be a mess,
And a tragedy.
The teacher, the crew, the pilot,
Are dead.
They are today,
Today's pioneers.

Todd O'Dowd

Pioneers

The pioneers crossed the continent
Just as we go into space today
Some live
Some die
When they live we are happy
When they die we cry
They are good people
That have a lot of courage
Continously traveling
Forevermore, never hesitating

By Justin Porter

Pioneers For Today and Tommorow

Pioneers of long ago risked their lives.
We still have some.
Out in space.
If some die we're sorry for them.
But they want to helps us.
So why do they die?
I guess we'll never know.
But what do we do we do if a pioneer dies?
We all know,
We have to be brave.
To have lots of courage just like the pioneers.

by Marsh M.

It was sad when the spacesuttle Challenger blew.
But there isht anny thing we can do.
They went to teach a teacher about space.
There were no seurivors in this case
The familys are sad
There were seven people on the ship.
If you remember they were the pioneers of today
Then it won't seem so bad.

Shayne LaCroix

BY JEREMY Kitchin

PIONEERS-IN-SPACE

Pioneers in the Challenger fly not so far
Risk their lives to ride very far.
People are sad
That they see the ship go down
Not one came around for the poor
little teacher died Risking live flying
in the Challenger Whish there just
one surgrivor
Wish they could come back anotes day.

Space Pioneers

The space Pioneers that died today were very, very, special and brave. They sat together happy to go on the journey to space.
Yes, they were very, very, very brave they risked their lives just to go on the journey to space.
Children lost their parents.
I wish they didn't die so soon.
