Announcement of President at First Meeting, 117th Session, Tuesday, 28 January 1986

PRESIDENT ..... My fourth announcement. It is with deep regret that we heard this morning that the space shuttle craft Challenger exploded this morning on taking off. Men and women have given their life to explore space. Through the Representative of the United States of America I would like to express to these explorers our admiration and to convey to their families and to the Government of the United States our deep sympathy.
