Dear Teachers, and Families of
Astronauts,

The sky was blue
And looking good
The shuttle blasted off
while everyone stood
everyone looked
feeling proud
but a minute in
things looked bad
People in shock
People in pain
but everyone prays
it will go up agian

From

MATTHEW. Burwood

Jan. 30, 1986.

Dear Students of Concord High School

We at Mac Millan share the grief of your loss. Mrs. M'Auliffe must have been a wonderful person, but we have to think of this tragedy as a triumph. Mrs. M'Auliffe went up in the Challenger to explore the unknown and now she explores the heavens. She is no longer here but her memory remains. If you want to keep her alive in your hearts, then fight for the things she fought for. Don't stop dreaming and one day maybe we all might explore space. You have our sympathy during this difficult time

Sincerely
David LeSauvage

To the students and teachers
of. Concord. School

I would like to tell you that
We the Grade eight students of
Sir Ernest Mac Millan school share
your feelings at ~~this~~ time. When we
heards that a teacher was going
up into space we were excited, as
you must have been.
Please accept our sincere
sympathy for the loss of your
teacher and the other well trained
astronauts

Sincerely
Jamie Wall

January. 30, 1986

To the families of the astronauts of Challager.

I don't have a lot to say on these very sad days. The shuttle is no more. Because of the death's the nation is in mourning.

The space progam is very fine thing and this unfortunate mishap should not be a set back but an inspiration to all.

Sincerely
Tim Hick

Jan. 30, 1986.

Dear Students, Teachers and families of the astronauts,

When I heard that the shuttle blew up I felt shocked because I didn't think that this would ever happen. I think that the people that were on board were very brave and deserve alot of respect. I think every January 28 we on the U.S.A should have a minut of silence for the lives lost in space exploration. What ever you do don't stop on striving to be the best you can be. Keep striving on with the dreams you have.

Sincerly
Richard
Stanbury

When I saw what really happened I was astonished. When God took the lives of seven well trained astronauts, I thought to my self how the people associated with them must feel. I know if I knew the people on the Challenger, I would have been more upset. I send my deepest sympathy to all who knew Mrs. McAuliffe and the six spacemen. I hope the shuttle programme will be continued.

The Shuttle Mishap

Dedicated to these Brave Astronauts

Up we fly
Out in the sky
We fly so high
Way past the eye

People cry
And people sigh
For those who are special
In the sky

Dear friends, family, students, and associates of the teacher,

I'm writing to express my greatest sympathy about the accident which took the life of six astronauts and your friend or relative, Christa Mc Auliffe.

I know this is only a short letter, but I'm hoping it will help ease the pain, once you know that people care and are praying for you in this trying period of life.

Sincerely,
Ruth Klein

To the Students of Concord High School

When I saw it happen it was eleven thirty eight, and I thought it was just part of a movie but when I saw it at twelve o'clock I realized that it was the challenger. I was really shocked when I saw it happen. When I went back to school I heard every one talk about it. I will never forget it. I know that it is a hard time for you. We send our deepest sympathy to you at this time.

Sincerely,
Helge Hetzer

January 30, 1986

Dear friends, family and associates of the astronauts,

I was shocked to hear of the terrible tragedy concerning the space shuttle. Please know that you have my deepest sympathy. I can only imagine your feeling of loss. These people were extremely brave, and I'm ~~very~~ extremely hopeful that nothing of the sort will occur again. I wasn't pleased with the way the media presented this. It must have been a terrible invasion on your privacy. Please accept my condolences.

Yours truly,

Norma Wennick

Feb 2 86

Dear Students and Teachers,

When I heard that the Space shuttle blew up I didn't believe it, because I thought it was a perfect ship, and when it took off it would run as smoothly as glass. I can't believe that it blew up. If the people tell us they triple check everything nothing should go wrong. I think they shouldn't have shown the families at this moment of grief. I hope thier privacy is respected.

Sincerly

Michael Eagleson

Dear students,
Teachers, and family of Mrs. McAuliffe

I am aware of what has happened to Mrs. McAuliffe and I know that she is a very important part of your lives. I know how you must feel. Not that long ago a very dear friend of mine was killed in a tragic accident. I wish I could have done something to prevent this death. I now realize there was nothing I could have said or done to prevent this from occuring.

I would like you you to accept my heartfelt sympathy and know that I do care and hope you remember them with happiness, and never forget the good memories you had shared with her.

Sincerly
Tabetha Mc

Feb.5 / 1986

Dear Concord Highschool
and NASA

The lunch I watched the SpaceShuttle takeoff, it exploded. I told my mom and we discussed ~~about~~ it in school. Everyone of Concord Highschool and N.A.S.A. must feel badly about losing Mrs. McAuliffe and the six other astronaughts. I hope you can learn from this disaster and continue to develop your space programme.

Sincerely,

Mark Gillis

THE SHUTTLE

I CAN REMEMBER WHEN THE COLUMBIA WENT UP, IT WAS SUCH AN INCREDABLE FEAT! AFTER THE CHALLENGER WENT UP WE STARTED TO TAKE SHUTTLE FLIGHTS FOR GRANTED, BUT NOW SINCE THIS TRAGEDY THE WORLD HAS BEEN ALERTED TO THE HAZARDS OF SPACE TRAVEL. I FEEL SO SORRY FOR THE SEVEN PEOPLE WHO LOST THEIR LIVES, BUT YOU STILL HAVE THE COLUMBIA TO USE. I HOPE THIS DOESN'T DETER YOUR DRIVE FOR EXCELLENCE.

SINCERELY,

ALEX MICKALOW

"Peaceful Skies"

As the flames begin to roar
the challenger begins to soar
Higher & Higher the shuttle will rise
High into the peaceful skies.

As they watch their heroes fly
Way up into the peaceful sky
One might say this is the end
As they say goodbye to a friend.

By
Leslie Starr

With a world full of roses comes tears
With a world full of beauty comes tragedies
A mist of silence wraps around the souls of all who watch
The memory of the fire's hell shall linger through our minds
Many tears will slip from eyes and hearts will be with their lost ones
A trace of endless parts remain the shuttle, smoke and tears.
With a world full of laughter comes cries
With a world full of roses comes tears.

Tia Dawson

To Be Watching from The Ground.

As the countdown started, people were cheering,
As the shuttle lifted up high,
Suddenly they stopped, and they were peering,
Unto an exploding sky.

As people cried, they soon found,
It was hopeless to call a name,
The feeling to be watching from the ground,
And their families never the same

Claire
Gutierrez

Shuttle Mishap

We see the flames so bright & hot.
Into the air the shuttle shot.
One minute into wonderment we
see the flames explode.
And we say fairwell to friends
so proud & bold.

By: Joanne Stammers

MANS DETERMINATION TO EXPLORE

Man has explored both ground and air
His imagination is always there
Man has looked up to the sky
And built an aircraft that does more than fly
Man has come a long long way
He is still determined to explore each day
The shuttle was prepared
And launched with grace
It sliced the sky
In a firing race
A few seconds later
Tragedy occured
Up in the sky
An explosion was heard
As the spaceship fell
There were memories raised
An attempt to explore
The vast open space
As they looked in the debris
All they found were sweet memories

To the students and family of Mrs. McAuliffe.

When I heard about the terrible tragedy of the shuttle, I felt so badly, and I wished I could do something to help all the people that had been hurt by this awful accident. It must be very hard for you, losing someone you care for, but I know you are very proud of her. Going up into space, into the unknown, was a very brave thing for your teacher to do. We are all very proud of her and her six heroic friends. Our blessings are with you.

Sincerely,
Heather Froud.
