CURRENCY COVER & LABEL

CURRENCY COVER

Coated both sides

Choice of surfaces – Plain, Embossed

Available in Gold/White, Silver/White, Copper/White

8 or 10 pt. calipers

Provides printability using offset, letterpress, screen processes

Metallic side allows fine-screen halftone printing with semi-gloss, opaque or transparent inks. Use inks that dry by surface oxidation.

Coated white side adds definition and deep lustre to fine-screen halftones and solids. Use regular quick-set (fast-drying) inks.

Currency's weight and strength allow diecutting, foil stamping. (Check foil stamping precautions beneath swatches.)

CURRENCY LABEL PLATE

A versatile sheet with a distinctive metallic surface

Suitable for letterpress, offset printing

The sheet lies flat, pastes readily, folds easily, diecuts well

Accepts special effects such as varnishing, lacquering, foil stamping, embossing

Stock sizes, weights listed beneath swatches.
