The paper was folded in thirds and is dirtiest and most discolored on the back, especially along the creases. There is a stain the in top left corner on the back and you can see a hole just left of the left crease along the top edge on the back. There are also areas where the ink from the front has bled through due to water damage. The water damage is concentrated in the middle on the front side. Brown, oil type stains are along the bottom edge on the front and around the top crease on the front. The right edge is jagged as if torn and the bottom edge as well. There are ink bleeds along the bottom edge on the front as well.
