

P2001.003.168 was a binder of Indian Leaders Conference photos, but it appears these photos have been disassociated from the binder and given individual numbers and folded into the general P2001.003 accession. In addition, this particular objectID was given to one of the photos most likely from the Indian Leaders Conference.

P2001.003.166 was a binder of photos from the Sky-Ute barbecue and powwow, but it appears these photos have been disassociated from the binder and given individual numbers and folded into the general P2001.003 accession.

For both of these numbers, I could go through and guess which photos went with each binder, but there is no guarantee they would all be correctly matched. Leaving them as individual photos.
