Dear Mrs. Haile,

We, at the Shelter Island Historical Society, are delighted to take part in the effort to have the archaeological site at the Richards' property on Shelter Island radio carbon dated.

I am enclosing a check for \$125.00 toward the cost of the laboratory expenses. We will be looking forward to the report on the age of the bones and other historical information.

I am happy to hear that Dr. Stefan will release an announcement to the press at the appropriate time. In the meantime, I ask that you keep me informed of the date and time when the bones will be returned to the site for reburial.

With best wishes,

Louise T. Green

Director
