Thanks Katherine. These are great. I actually received these from the sellers of the property when we purchased in 2017, who undoubtedly got them from you. I have also the 2015 IDC report. I'd love to print and bind these studies to keep as literature in the cottages themselves for the public to view..do you see any issues of intellectual ownership that might arise from doing so?

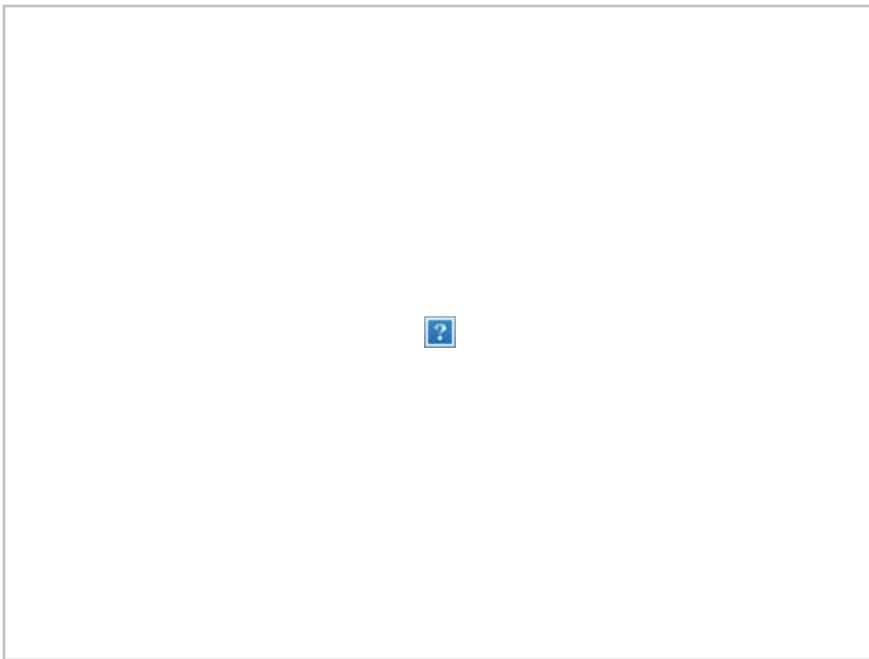

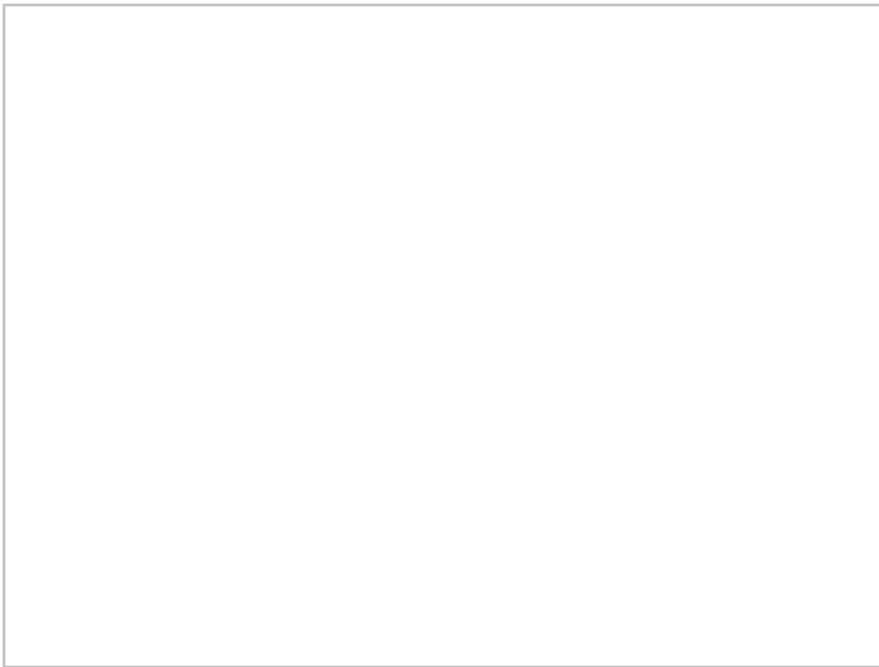

Rick was the construction monitor hired by the bank to certify our draw/ progress schedule during construction. He was awesome to work with. We go way back, from the days that I was a trim carpenter and actually did some work fixing the rear gates, a back step, and some interior trim at the Aiken Rhett house!

I look forward to seeing all of you. [Here are some pictures of the cottages as they are today.](#)
See y'all soon!

Cameron
