LITERARY INSTITUTIONS.

CHARLESTON LIBRARY SOCIETY.

The Charleston Library Society was formed in 1748, and has therefore existed eighty seven years. In 1778, its collection had increased to 5,500 volumes, when a desolating fire occurred in the city, which destroyed the house in which the library was deposited, and most of the books, leaving but 185 volumes. In 1790, the library owned but 344 volumes, besides M'Kenzie's, which were reduced to 403. During this year (1790) the Society obtained of the legislature the present spacious depository in the upper story of the State House, to which the library was immediately removed, and where it has remained until the present time, forty-five years.

The Society have, during this Summer, purchased the building of the South Carolina Bank, at the corner of Broad and Church-sts, for \$15,000, to which they will remove as soon as it is prepared for their reception. The present collection of books amounts to *Eighteen Thousand* volumes, among which are works of great cost, and high, literary, and scientific value—as the work on Egypt prepared under the auspices of Bonaparte, in 11 imperial volumes of plates, and 25 octavo volumes of explanations and memoirs; Audubon's Ornithology, expense, \$800—two copies of the English Encyclopædia of different dates—800 sets of Novels—Standard French works, among which are the Dictionnaire Raisonné des Sciences &c.—29 vols valuable Engravings—the Shakespeare Gallery, consisting of 92 prints in gilt frames, &c. &c. The number of members is 250.
