Yes, Carter reached out and asked if we would release this data, which I of course said we would. Yes, Drayton Hall and the NT are spearheading the NHL nomination, which is excellent! We will be involved in a support role, as needed.

Winslow—these are the GIS files from Brockington that Inna had in her files from the Ashley River NRHD project (Inna is no longer at Brockington—she went to work for CWS). I wanted Karen to be able to have them for the archives. I don't know if we can actually read them without the GIS software – but it's worth keeping and we routinely get requests for our GIS data on Cooper River and Ashley River.

Jon Marcoux says that the NPS or the NTHP is looking at making the entire Ashley River Historic District an NHL Listing. Is HCF involved at all?

Thanks-  
Katherine

Eric,  
Katherine and Winslow both agree with sharing the data.

Regards,  
Jon

I found it! There is a folder with a series of GIS files that appear to provide all of the things that were mapped. File types include cpg, dbf, prj, sbn, sbx, shp, shx. Will that have everything that you might need?

Looked at the report. It was done/funded by HCF and we worked with Felzer Consulting to prepare

the expanded district. Be sure to check with Katherine about “sharing” the data. I don’t know what their funding was – sometimes if NPS grants, there are restrictions on data dissemination. If Katherine says it’s OK, I will forward to you just to cover our “behind” if need be.

Somewhere.... I will see what I can find. I know Inna gave these files to whoever held the grants, etc. (HCF??). I never quite understood who was doing all that

Hey man,  
I know this is a blast from the past, but the folks from the National Trust are thinking about nominating a portion of the ARHD for NHL status – I think as a way to regulate development. Might you happen to have the GIS files associated with the report you all did with Katherine?

Regards,  
Jon
