STEEL RISES FOR NURSES' HOME—Some idea of the size of the new \$500,000 nurses' home for St. Francis Xavier Infirmary may be obtained from the steel frame which now is rising on the Ashley avenue site. The residence at the corner, now being used as a temporary home for nurses, will be razed when the building is completed. Designed by Harold Tatum, local architect, the building is being constructed by the South-eastern Construction company, of Charlotte. The six-story structure will be faced with gray brick. Residence at 148 and 150 Ashley avenue were razed to provide the site. (Staff Photo by Holcombe.)
