OUTGOING CONDITION REPORT

Accession #: T026-2019

Object Name: Double Chest of Drawer

Condition Notes:

The loaned Charleston double chest has suffered a broken top board; known to Historic Charleston before its transport to the Collections Building at CWF. (see pictures below).

Upon further inspection, several small splinters along with an Ethafoam block were discovered inside the cornice cavity below the top boards.

Two long (3" and 4") splinters associated with the two cut-nails from the backboard are missing.

The backboards on the chest have all been off and re-nailed with 20c wire "box" nails.

There are also a few long cut nails along the top edge of the top-most back board that held the top boards.

Treatment in 2019:

The broken top boards were re-adhered with (Lee Valley) Fish Glue.

Two cut nails were reset in the top-most backboard after repositioning.

- Nail splinter loss filled with Araldite 1243 (Ciba Geigy) paste epoxy.

- Color the fills with acrylic paint (Liquitex).
