Object Name/Description: __Arched Niche_____

Object Location: __Main Staircase Hallway (on the wall to the left of the Telephone Room)

Description of Damage: (Please include when, where, how, who, location of damage on object, attach photos or sketches):

During Netflix The Diplomat film shoot prep, crew member carried a prop bed frame through the Main Staircase Hallway. The bed frame knocked into the niche. Not clear if it bumped the upper left corner or other area. Cherub (?) face was knocked off. Piece appears to previously have been glued on, this is likely not the first instance of damage. Next steps including installing more lighting in the space and taking down niche to prevent additional damage. Emily is also reaching out to conservators to get an estimate for repairs.
