

Fairchild Aerial Surveys, Inc.

Complete New Plant under Construction at Hoboken, N.J., for Maxwell House Coffee—General Foods Corporation

EXPERIENCED ENGINEERING

● Are you in doubt as to ... WHAT... WHERE... WHEN... or HOW... to build? Straight line production is ideal, and can usually be approximated by careful study, without over-building, and with provision for future expansion. An effective arrangement is usually a simple one. Experienced Engineering is the least expensive and most valuable part of a Mill Building program. Our preliminary suggestions and estimates are made without cost or obligation to you. Write, telegraph, telephone or come to our Cleveland or New York Office.
