Dear Carol,

Thank you for your nice note. I was sorry to hear that Byron had died. My friend who was to go with me on the horseback riding trip in Vermont this summer has died as well. We thought she had flu --- and it went into meningitis. She was only sick 10 days before she died. She was 35 years old. Mom & Dad quickly planned a trip so that Lynn

and I would go to Arizona and
maybe avoid becoming depressed.
I will still be thinking of you
all as you gather to remember
& renew old friendships. It
sounds like you will have a
good crowd. Our class really
knew how to have a party!
No need to send back our school
photos - we have "blue million" of
these. Thanks again, Carol.

Love,
Ann
