

GOLDEN GATE MINE.—The *Union* (Sonora) *Democrat* says: W. G. Long, who has been prospecting a quartz vein near Wood's creek, below Sonora, informs us he has found a three-foot vein at a depth of 20 feet that prospects \$40 to \$60 dollars to the ton. From the talc that runs in the vein and the casings he has obtained very fine results. We are glad to hear the vein promises so well, and trust friend Long will reap a fortune for his energy and hard labor.
