

Ordnance Office

Washington 31st Dec. 1855

Captain C.P. Stone

U.S. Arsenal Benicia Cal

Sir

Your monthly reports of Hired men, for October and November, which have just been received with your letters of 30th of November & 2nd of Dec. show an increase of wages to Edward Williams, Clerk, to \$4 per day, his pay previously having been but \$3.50. Article 32 Ordnance Regulations requires that any increase of wages shall be promptly reported to this Office, with an explanation of the circumstances requiring the increase, but no such report has been received in this case. In the case of Clerks, it is not usual to allow of an increase of wages unless the necessity for it has been previously reported, and the increase sanctioned from a time to come. Up to within ten or twelve years the employment of Clerks at Arsenals, and the determining of their wages, required the special action of the Secretary of War.

I am Sir, respectfully

Your Obt. Servt.

AK Craig

Col Ords

_____ Biography _____

Col. H.K. Craig July 1851-April 1861

In June 1821, Captain Craig was transferred to the 3rd Artillery, and in December 1823, received his brevet majority for ten years' faithful service in one grade. During the early 1820s, Captain Craig supervised several lead mines in Missouri and in Illinois, and in May 1832, was promoted to the rank of major. At some point thereafter, he was assigned to the Ordnance Corps, and during the War with Mexico, served as Chief of Ordnance for General Taylor. For his services in the Battle of Monterrey, he was brevetted lieutenant colonel in September 1846. Following that battle, he and a small group of officers and men moved a group of twelve pounder cannon from the Monterrey battlefield to the town of Buena Vista, 67 miles away. This was accomplished between dusk and dawn on a rough

road within a period of seven hours, despite the fact that the axle on the gun carriage supporting one of the cannon snapped and had to be replaced. Although General Santa Anna, the Mexican commander, had abruptly withdrawn from the battlefield before Colonel Craig and his men arrived, his action nevertheless won him and his staff a cordial mention in general orders. He also gave an excellent account of himself during the battles of Palo Alto and Resaca de Palma. From 1848 until 1851, Colonel Craig served as an inspector of arsenals.

On 10 July 1851, Colonel Craig was appointed Chief of Ordnance with the rank of full colonel. During the ten years before the Civil War, budget allocations for the Army were cut back considerably, and Colonel Craig did as much as he could to ensure that adequate funding was available for the production and procurement of the necessary weapons and munitions for peacetime activity. He encouraged studies of foreign ordnance and supported efforts to keep a good supply of proven models of rifles, cannon, and similar equipment on hand. Breech loading rifles were extensively tested during his tenure as Chief of Ordnance, but were not adopted because of problems with the cartridges of that time. In 1855, however, the Ordnance Board decided to convert existing stocks of smoothbore muzzle loading muskets to .58-cal. rifled muskets, and the days of the smoothbore were numbered. Finally, a modified 12-pounder Napoleon was tested and went into production. Colonel Craig was regarded as an experienced, conscientious, and dedicated officer, although he held strong views and was sometimes acerbic with his subordinates.

In the spring of 1861, at the age of 70 and after nearly 48 years of Army service, Colonel Craig was relieved of his duties at the direction of the new Secretary of War, Simon Cameron, on the grounds that the Ordnance Department needed more vigorous leadership in light of the national emergency. Colonel Craig protested this action, but Secretary Cameron, who had consulted with General Winfield Scott, the Army's commanding general, stood firm. Colonel Craig then took the matter up with President Lincoln, but the harried new Chief Executive chose not to intervene. Colonel Craig nevertheless remained on duty for another two years in an advisory capacity, and retired on 1 June 1863 after nearly fifty years of service. On 13 March 1865, he was brevetted brigadier general for his service of over half a century to the Army and to Ordnance. General Craig lived the remaining six-and-one-half years of his life in Washington, where he died on 7 December 1869, aged 78.

----- Add'l Info Edward Williams Clerk -----

In the returns from military posts for June, 1855, Edward Williams a civilian clerk is shown as receiving \$3.50 per day. The Master Armorer gets \$5.00 per day, Armorers get \$3.00 to \$4.00 per day and a laborer gets \$2.00 per day.
