# THE SAMOYED ASSOCIATION

## PEDIGREES
## 1901 - 1959

F.J. Jackson with
Sally, Nimrod, Rawing

A.B. Armitage with
Sammie

Major Jackson on an expedition with some of his dogs

# INTRODUCTION

This book, published by the Samoyed Association of Great Britain, aims at helping the breeder by showing as clearly as possible the blood lines of all the dogs and bitches that have become champions in this country. It is hoped that by careful study of these lines the standard of the breed will be maintained and improved. It might be thought that it is no difficult task to compile a list of pedigrees for a breed first imported a mere sixty years ago but unfortunately such is not the case because frequently (particularly during the war period of 1914-18 when the registration of dogs was not allowed by the Kennel Club) unregistered dogs appear in pedigrees and in most of these cases it is not possible to go further back with any certainty. All the details that appear here have been checked and re-checked and although error is possible we hope that it is minimal.

The method adopted gives each champion a number and whenever he or she or any of their forebears appear in a later pedigree it is stopped and the relevant number quoted. By reference back to this number the ancestors can be traced until a complete pedigree of each champion is built up back to the original imports.

Not the least important in this book are the illustrations. Here an attempt has been made to emphasize the important and continuing features of the breed through the choice of dogs that best demonstrate these. Among present day kennels illustrations have been limited to champions and challenge certificate winners. A comparison of these photographs with those of earlier dogs should be both interesting and instructive.

Our grateful thanks are due to the many people who have assisted in the compilation of these pedigrees and in particular to the Kennel Club for their frequent help. It is hoped that their reward will be in enlightened breeding that will improve the general standards of a beautiful breed.

W. E. LLOYD

# FOREWORD TO SECOND EDITION

When the first edition of Samoyed pedigrees was published in 1960, covering the period 1901-1959, Mrs. Dorothy L. Perry the then President said in her foreword "To the best of my knowledge this publication is the first of its kind to be sponsored by any canine association. Its production involved a great deal of work and acknowledgement is due to Mr.W.E.Lloyd who voluntarily undertook the bulk of the task on behalf of the Samoyed Association" Now 26 years on, with three volumes in print, again we must thank Mr. W.E. Lloyd, M.A., for producing this reprinting and also Mrs. Margaret Probst for her assistance in painstaking research and revision of pedigrees. Thanks are also due to members and friends of the Association who, in so many ways, have helped to finance these volumes.

We are fortunate indeed to have these records for our present use, generations to come will thank those who made it possible to delve into the history of the breed and their own dogs pedigrees. The nostalgic illustrations of early dogs allows us to judge for ourselves how much, if at all, our beautiful natural breed has changed in the passing years.

Freda Spector

President

# FOREWORD

Other people's researches have shewn that the Samoyed is one of the oldest, if not the oldest, breed still extant. This book of Pedigrees is not so ambitious as to trace our present dogs as far back as that, but we have taken as our starting point in the history of the breed, the earliest known specimens imported into this country. The pedigrees, therefore, cover a period of more than fifty years - quite a long time in the canine life-cycle.

The purpose of the compilation is not merely to compare our contemporary dogs with their ancestors, but to shew, as well as possible, how the breed has developed since it first emerged as a 'show' specimen, and these complete family trees, in conjunction with the illustrations, should prove very helpful to breeders seeking the salient characteristics in a particular line. There is interest, too, for the owner, or potential owner, in being able to see or choose his dog's "tree".

In conjunction with our book, 'The Samoyed', this present volume provides just about all there is to know about the breed and it has the same object - to help in producing worthy examples.

To the best of my knowledge this publication is the first of its kind to be sponsored by any canine association. Its production involved a great deal of work and acknowledgement is due to Mr. W.E.Lloyd who voluntarily undertook the bulk of the task on behalf of The Samoyed Association - of which I have the honour to be President.

DOROTHY L. PERRY
