THE SAMOYED ASSOCIATION

PEDIGREES
1982 — 1990

FOREWORD

This fourth volume of the Samoyed Association's Pedigree Book covers the period from 1982 to 1990. It contains details of 90 Samoyeds who gained their titles during this period, bringing the total number covered by the four volumes to 343 over a period of ninety years. The information available in these books to students of the breed is enormous and is an invaluable aid to the conscientious breeder attempting to ensure that the Samoyed retains the characteristics of type, conformation, temperament and soundness which endears it to so many.

The accurate compilation of all this information entails many hours of painstaking work. The Association - and indeed the breed as a whole - owes a large debt of gratitude to Mrs. Margaret Probst, Mr. W. E. Lloyd, M.A., and a Samoyed enthusiast in The Netherlands, Nick Smit, for the dedication which has made possible this latest book.

In addition to all the work necessary for this volume a policy of continuing checking has resulted in a number of corrections to earlier records. These corrections are being issued alongside volume IV and will thus result in an even higher standard of accurate information being available to owners and breeders.

The cost of production of these books is high and the Association gratefully acknowledges the generosity and hard work which have made the necessary funds available.
