

*The AVRO Jetliner — America's first Jet Transport*

## *high serviceability... low maintenance*

More time in the air, less time on the ground is one of the secrets of profitable airline operation. With this in mind, the designers and builders of the AVRO Jetliner have incorporated maintenance and servicing advantages that will assist ground crews. Engines can be serviced from the ground, inspection doors are within arm's reach and underwing pressure refueling is standard equipment.

In the air, the Jetliner is reducing flight time between cities. Those fortunate few who have flown in the Jetliner are proudly sharing their experience of smooth and comfortable flight with eager listeners. With greater carrying capacity, and the prospect of more flying hours per day, Jetliner performance promises a new high in serviceability. Studies of Jetliner serviceability and operation are available to interested operators.
