

## **Did you know?**

■ The Canadian government once funded a program to design a flying sau-

cer. But the project became so expensive, they sold it to the U.S. The saucer failed and the program was cancelled.

■ The term "flying saucer" came from a sighting in 1947

in Washington. The witness claimed the UFOs moved "like a saucer would if you skipped it across the water."

■ Because they rotate so quickly, pulsars send out signals of regular pulsing light.
