## AVRO ARROW (CF-105)

This guide consists of specific references to government sources on the CF-105, the Avro Arrow. While the Arrow had a very short existence, the project directly involved three government departments. The records in this guide are identified accordingly, beginning with the records of executive decision making at the Privy Council Office, followed by the Records of the Department of National Defence with overall responsibility for the project, and finally the Records of the Department of Defence Production, charged with the administration of the contract between the Crown and A.V. Roe. In addition, the researcher will find references to Sessional Papers from the House of Commons. These papers relate to the political debate triggered by the decision to cancel the project.

This guide was revised in December 2000.

#### Avro Arrow (CF-105)

Source

This guide consists of specific references to government sources on the CF-105, the Avro Arrow. While the Arrow had a very short existence, the project directly involved three government departments. The records in this guide are identified accordingly, beginning with the records of executive decision making at the Privy Council Office, followed by the Records of the Department of National Defence with overall responsibility for the project, and finally the Records of the Department of Defence Production, charged with the administration of the contract between the Crown and A.V. Roe. In addition, the researcher will find references to Sessional Papers from the House of Commons. These papers relate to the political debate triggered by the decision to cancel the project.

This guide was revised in December 2000.
