

**EXPANSION
COUPLING**

A constant volume telescoping coupling to accommodate structural flexure.

**DOOR UPLATCH
RELEASE**

A mechanical release hydraulically or pneumatically powered.

**LANDING GEAR
DOOR JACK**

An actuator with hinge pin hydraulic feeds and a multi-stage lock to facilitate sequencing of gear and door movement.

DOWTY

Wide EXPERIENCE over many years provided a sure basis for advancing with Avros in their development of a 4,000 PSI HYDRAULIC SYSTEM with a -65°F to 275°F temperature range for the ARROW. With the development of the aircraft, DOWTY continues as the MAJOR SUPPLIER of hydraulic components to Avro Aircraft.
