

AVRO AIRCRAFT LIMITED

MALTON, ONTARIO

REQUISITION FOR FLIGHT TEST

UNCLASSIFIED

R.F.T. NO. 5059

SHEET NO. 7 OF 2

DATE: June 9, 1958

AIRCRAFT 25203

ASSIGNMENT NO.

WORK ORDER NO.

6 ~~4~~ DATA

The majority of the results obtained from the tests described ^{above} herein will be used as input to a digital computer program which is presently being formulated. Since the Computing Dept. will have to punch a large number of cards from the sheets of data prepared by the film readers, there will be certain requirements to be satisfied with regards to their layout. It is suggested that Flight Test hold a meeting with the Computing Dept. before the photo panel is designed to discuss the layout of these sheets. The instruments on the panel can then be arranged to facilitate film reading.

The frequency with which the instruments in the photo panel are to be read for the various manoeuvres will be specified later.
