

Arrow Displays At Farnborough And Dallas Air Shows

LONG-RANGE GUARDIAN of Canada's northland is the theme of the static Arrow display at the recent SBAC Air Show at Farnborough. The Arrow model was built at Avro.

CENTRE OF ATTRACTION at the Dallas Texas Air Show of North American Air Defence was the Avro display that featured the Arrow, "Canada's First Line of Defence." This display was visited by many in attendance at the USA Air Force Association Exposition that pointed up the long-range interceptor role in the "defence at depth" concept of North American Air Defence.

"BEHAVED BEAUTIFULLY" says Peter Cope, Avro Experimental Test Pilot, as he talks over his first supersonic flight in an Avro Arrow. With Pete are, left to right: Jan Zurkowski, Chief Development Pilot; Spud Potocki, newly appointed Chief Experimental Pilot; Don Rogers, Chief of Flight Operations; and Dave Wagner, General Supt. of Flight Test.
