

October 26th, 1955.

TO ALL SPECIAL PROJECTS PERSONNEL

During the visit here, last week, of Major W.R. Stephens of the U.S.A.F., the following comments were made which are of significant interest to all concerned:

1. He commented highly on the rate at which General Project work had progressed.
2. The calibre of work was entirely to their satisfaction.
3. With regard to the 1/6 scale model, he said that many people at W.A.D.C. were surprised at receiving the model and hardware in the 6 month period as scheduled.

To this, Mr. Frost and I would like to add our thanks and appreciation for the thought and effort given by each of you to this undertaking.
