From: T. D. Earl
Chief Technician
Special Projects Group

It is intended that a record be kept of all reports written by the Technical Office. Miss Simpson is responsible for this record. At the commencement of a report it is requested that you obtain from Miss Simpson, a report number and at that time inform her of the title of your report. Miss Simpson will record the title, date and author(s) for each report number assigned from the record.

In connection with writing the reports, it has been decided to standardize as much as possible on the title sheet format. An example is attached for your guidance.

THRUST RECOVERY TESTS
WITH MODEL 3/14/1-5 — PROJECT 1794

SUMMARY⁷

An experimental investigation has been made to determine the order of magnitude of the streamwise thrust obtained from a jet of air discharged substantially normal to the stream direction from several types of exhaust nozzles fitted, in turn, in a wedge shaped trailing edge surface in a Mach 1.7 flow field.....
