**PAUL CARDIN (3.9 Million Views >) Never Was An Arrow II**

**::: AVRO CANADA IN 1948 and An Employee Parking Decal**

**DON'T THINK YOU and your car... were getting anywhere near THIS PLANT without one of these PARKING DECALS!**

Back in the day, 1948!

WHEN TORONTO was about to change the world!

**For the NEXT DECADE, CANADA would dominate the world of aviation and TORONTO would be the centre of all that RESEARCH and DEVELOPMENT activity.**

The Orenda 9, the Orenda 10, the Avro Jetliner, CF-100, the Avro Arrow, the Orenda PS-13 Iroquois and the Avrocar.

And if YOU don't know ANYTHING about these great Canadian achievements, can't name even a few project related names, sleep on, friend, sleep on...

'nuff, said—

ED NOTE: KEEN OBSERVERS will note that collection of small buildings (upper left-hand corner) IS Toronto's Airport.

YES, it was once that small—

**CENTRE-RIGHT**, on the runway IS a **CF-100**, doing taxi trials?! Remember the year is 1948, likely April or much later. **FIRST FLIGHT** was in January, 1950. The profile I can see in my LARGER in-house photo is clear. It's all in the tail.

Clunk, CF-100, Lead-sled... it's her!
