with ARC's NEW CD-1 Course Director

Now it's easy to keep a straight, true course wherever you fly...make sure ILS approaches, maintain OMNI tracks with certainty. ARC's new Course Director automatically directs the pilot to the correct headings required for effectively intercepting and making good a desired track. Heart of the system, the Compass Slaved Directional Gyro, gives constantly corrected directional information. The ARC Course Director system is accurate to one degree.

Computer portion of the system combines directional and track information obtained from the Localizer/OMNI Receiver and makes computations to provide the pilot with correct heading to intercept and/or make good a desired track and compensates for cross-wind. It relieves the pilot of 90% of his mental effort, helps prevent missed ILS approaches, saves time, effort and fuel, contributes to greater safety. Ask your dealer for complete information.

Dependable Airborne Electronic Equipment Since 1928
