AVRO AIRCRAFT: YOUR FIRST LINE OF DEFENCE

Squadrons of RCAF CF-100's manned by keen, alert pilots and navigators guard Canada's northern approaches on a round-the-clock alert

FLIGHT OVER: INTERROGATION TO COME

A.I.T. LIBRARY
DISCARD

There's something about the bearing of these men of the RCAF . . . something in their confident stride as they return from an interception exercise . . . that speaks of a job well done.

And why not well done? For many months they received intensive training to prepare them for exercises like this . . . and for the dark day when enemy aircraft may actually appear in the skies over Canada.

And what of the planes they fly? Avro Aircraft's CF-100 all-weather interceptors are powered by twin Orenda engines, have greater range, more power and more striking force than any all-weather interceptor in service anywhere.

Newer and more powerful flight projects are constantly underway in Avro Aircraft's extensive engineering division, staffed by the most outstanding research, design and development engineers in the aeronautical industry.
