CANADA'S AERO TRADE MAGAZINE

1945 **WATCHFUL PEACE** 1955

The constant Peace and Serenity experienced throughout the vast reaches of our colourful land have not been disturbed in a decade that won for Canada expanded engineering resources and skills.

To help maintain that status, Avro Aircraft accepted the engineering and manufacturing responsibility of providing Canada with its first twin-jet military aircraft ... a night and day, all-weather, long-range interceptor, unlike anything then in production in the world.

The responsibility has been fulfilled. Canada's Royal Canadian Air Force has been equipped with the Avro CF-100 in multi-squadron strength. Improvements

and refinements maintain its rating as one of the most effective interceptors of this type in the world. And in 1956, CF-100's will start augmenting RCAF NATO squadrons in Europe.

As Canada's second decade of jetpowered aeronautical achievement gets under way, Avro Aircraft is undertaking the design and development of a new supersonic all-weather interceptor, which will maintain Canada's leadership in producing this type of aircraft.

It's been a decade of progress in Canadian Aviation ... contributing to a decade of Peace that gave Canada a worthy place in world aviation.
