# AIRCRAFT

CANADA'S AERO TRADE MAGAZINE

CANADA'S FOREMOST AERONAUTICAL ENTERPRISE

*For the first time in the impressive history of the Farnborough Air Show, a Canadian-designed jet military aircraft, a completely operational CF-100, displayed its power and performance as part of the daily flying display.*

## FLIGHT LEADER CHECKS HIS LOG

In the deadly serious business of guarding the northern approaches to Canada and the Western Hemisphere against enemy air attack, RCAF pilots and navigators function as a perfectly coordinated team. On that team, too, are the operation's officer, navigation chief, armament officer, radio control officer and ground crew.

Backing up this team are the men at Avro Aircraft. For it is their job to design and build planes capable of meeting and repelling attack, if attack should come. This constantly expanding objective is being met by Avro Aircraft's extensive engineering division led by the most outstanding research, design and development engineers in the aeronautical industry. Powered by twin Orendas, no other all-weather interceptor in service today can equal the CF-100 for power and range.
