## SALVO AT 40,000

This split second in the RCAF's radar-controlled lead collision course attack technique demonstrates the most powerful weapon in air defence.

Automatically released, a salvo of rockets from the Avro CF-100, packing the punch of a destroyer, *boxes the target in a lethal concentration of fire power.*

Interceptor squadrons of the RCAF being equipped with the Mk. 5 variant of the CF-100 . . . capable of operational performance at high altitude . . . practice rocket firing day and night, as part of their round-the-clock alert.
