Radio Corporation of America,
Building 10-7, Delaware & Cooper Sts.,
Camden 2, N.J., USA.

Arrow Weapon System - Conie Installation

- 1 Reference (a) para 3.2.1.6 calls up a Conie capability in the Arrow Electronic System. Further, the CAS has directed that a Conie capability be included in the Arrow Weapon System coincident with the introduction of the Arrow to squadron use.
- 2 May RCA, therefore, be directed to proceed immediately to provide Conie capability in the Arrow Electronic System. It is understood that you have already requested, from RCA, information as to the present status of ASTRA as far as a Conie capability is concerned. May this information, together with a schedule showing the specific items of work which must be completed to meet this requirement, be forwarded to AAMS as soon as possible.
- 3 It is understood that no additional funding is necessary to provide a Conie capability.
