Arrow Electronic System -
Radome Implications for Genie

1 Attached are six advance copies of Section 10, Status Report No. 28, to be issued 8 Sep 58, on the AI Radome.

2 The above reference states the requirement for an AVRO development program leading to an Arrow Genie installation. The attachment summarizes radome problems concerned with the incorporation of Genie and makes a strong recommendation that AVRO initiate a radome development program to the described Class A Specification.
