CANADA'S AERO TRADE MAGAZINE

**ENGINEERS NEEDED!** Aeronautical, mechanical and electronic engineers are needed by Avro Aircraft Ltd. to help meet the increased demands of the Jet Age. Your training and skills can assure you of a highly paid future with Canada's expanding aeronautical leader. Write to Personnel Manager, Avro Aircraft Ltd., Malton, Canada.

## *... in England now*

Three CF-100 all-weather interceptors recently flew the Atlantic and are now on evaluation tests with the R.A.F. in England.

In that swift crossing, Avro Aircraft reversed the trend of aeronautical development to place at the disposal of the R.A.F. one of the world's outstanding all-weather interceptors.

Additional evidence of the serviceability and performance of the CF-100

is its unanimous selection to equip by 1956, four R.C.A.F. squadrons

to strengthen the all-weather defence capabilities of NATO in Western Europe.

Avro Aircraft, as one of the main industrial arms of the R.C.A.F., is constantly at work reinforcing and maintaining the air defence of the free world.
