MEMORANDUM

29 Jul 58

Arrow Weapons System - Genie Installation

1 Reference AAWS memorandum of even file dated 21 Jul 58 and DADR's reply (minute (2)) dated 25 Jul 58, the CAS directed to-day that we are to proceed with development of a Genie installation for the Arrow aircraft, and expressed surprise that certain aspects of this program have been held in abeyance.

2 Appropriate action is required to ensure that the installation is operational coincident with the introduction of the Arrow to squadron service.

④ CAE

For sig. plax! AWS/DDP & DDP have been asked to take
contractual action with AVRO to avoid further delay. The implication was (error)
the AWS program of accelerating the Genie installation will be
discussed with AVRO to obtain a realistic cost picture. *[Signature]* 13 Aug 58.
