

*The F-86 is manufactured
in Canada by Canadair Ltd.*

We're proud of our associations . . .

Wherever the CF-100 and F-86 fly . . . at extreme temperatures . . . high altitudes . . . supersonic speeds . . . Canada Decalcomania Decals go with them.

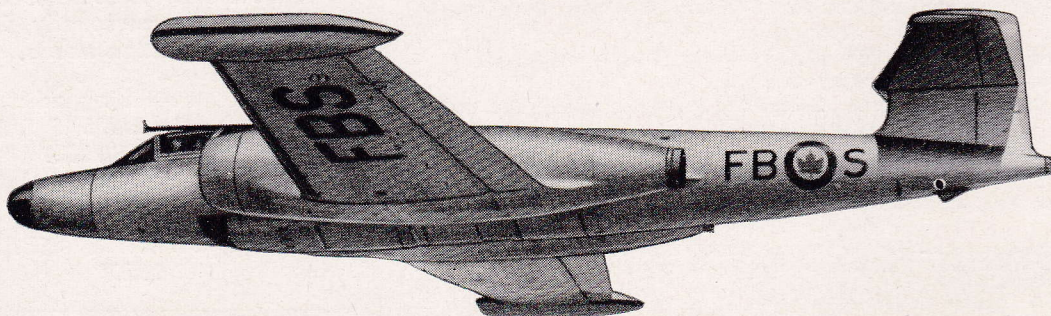

Decals are used for instructional data and all types of internal and external markings on various models of aircraft. The transfers used on aircraft surfaces are specially designed from Canada Decal formulas and have extraordinary adhesion to all types of surfaces.

The Decals used in the CF-100 and F-86 are the result of years of experience in the design and development of Decalcomanias of all types.
