Countdown

Peter Zuuring

Arrow Countdown

Arrow Countdown, the first in a series of books that will detail the rebuilding of Canada's most famous airplane, the Avro Arrow. Since the publishing of Zuuring's ground-breaking *Arrow Scrapbook* in 1999, thousands of books have been sold to interested Canadians. As a result many more hidden parts, plans, reports, photos, etc., have surfaced making the dream of having our Arrow back in the sky a distinct reality.

The Arrow Alliance is proud to share, not only with aviation enthusiasts but Canadians at large, our Arrow related findings.

In this first Countdown:

- Learn all about Arrow supersonic flight from those who were there - featuring "Spud" Potocki
- Follow cockpit development with never-before-seen detailed photos and Institute for Aviation Medicine studies
- Read about plans to rebuild the Arrow and how it can be accomplished, includes sample Technical Bulletin
- *More Vignettes* - some highlights:
 - walk around stricken Arrows
 - Arrow technology for TSR2
 - Iroquois engine recovery in the UK
 - Engines sold provide \$2,000,000 slush fund
 - Arrow accident and molecular physics and much more.

The Arrow Alliance
*Reminding Canadians that
we can do great things.*

February 23, 2009.
*100 years of powered
Canadian flight.*

*From Baddeck to Malton...
will you be there?*
