CP-105 - INSTRUMENTATION - ISSUE 1

UTILITY HYDRAULICS

Items underlined are added since Issue 5, Ref. 6302/22/J, Jan. 3, 1956.

Item	Range	Accuracy	Accuracy % of full range	Sampling Frequency
1. Pump inlet pressure (one pump)	0-200 psia	$\pm 10\text{psi}$	$\pm 5\%$	10/sec
2. Pressure Regulator "Return" port <u>press.</u>	0-500 psi	$\pm 10\text{psi}$	$\pm 2\%$	<u>Cont.</u> *
3. Pressure Regulator "System" port <u>press.</u>	0-5000psi	$\pm 50\text{psi}$	$\pm 1\%$	<u>Cont.</u> *
4. Pump inlet temperature (one pump)-65 +300°F		$\pm 5\text{F}^{\circ}$	$\pm 1\%$	2/min
5. Brake cylinder return temperature-65 +500°F <u>(one off)</u> **		$\pm 10\text{F}^{\circ}$	$\pm 2\%$	1/sec

* Recordings req'd only for periods of equipment operation. (i.e., U/c up or down
and S/B operation)

** To be measured close to brake cylinder.
