

Avro Releases Its Arrow

The Avro CF-105's historic first flight recorded for the readers of Canadian Aviation - with our congratulations to Avro Aircraft Limited, and to the firm's chief experimental pilot Jan Zurakowski.

JAN climbs aboard for the Arrow's maiden flight.

Results of the initial flight testing

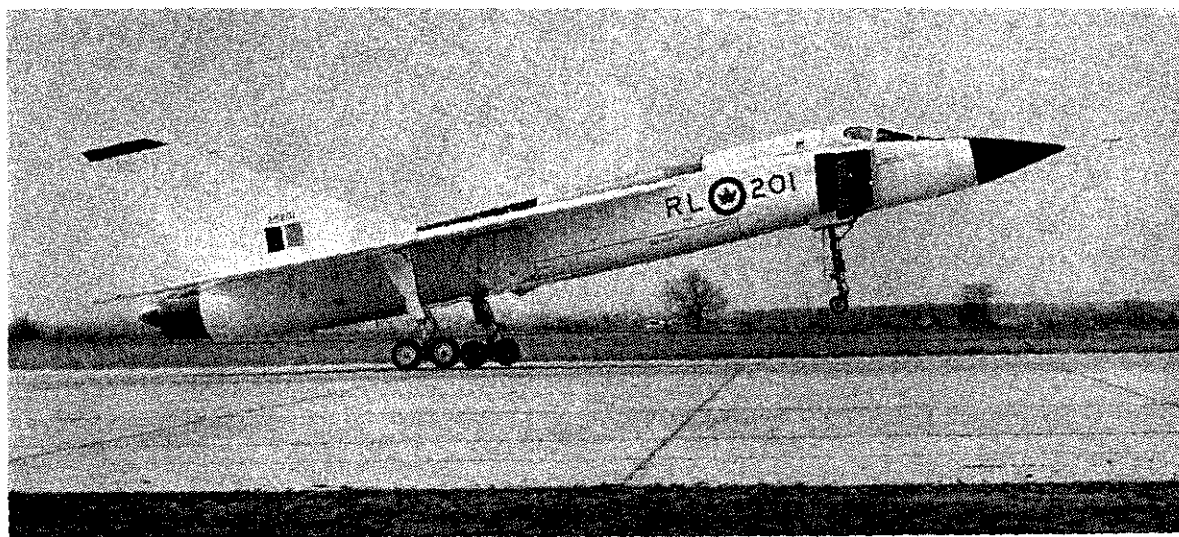

ON THE GROUND. The CF-105 nears completion of its ground tests—rolls out for engine testing runs at Malton.

CANADIAN AVIATION MAY 1958

PICTURED in CANADIAN AVIATION last month on its first take-off, the Arrow is seen above in landing trim.

program are reported to be exceeding all expectations of Avro and the RCAF

AIRBORNE. Coming "unstuck" for the first time—the first of the main wheels has just left the runway—the Arrow reaches for the sky, nose high. During recent tests plane is to have exceeded 1,000 mph in level flight.
