SHUTTLE MISSION 51-I

51-I INSIGNIA — The crew emblem for STS 51-I is based on a strong patriotic theme with the basic colors of red, white and blue suggesting the American flag and a dominant American bald eagle in aggressive flight. The shock wave represents that formed by the orbiter during the entry phase of the flight. Surnames of crew members surround the top part of the circular design. The five member crew is composed of Astronauts Joe H. Engle, Commander; Richard O. Covey, pilot; John Michael (Mike) Lounge, William F. Fisher and James D. van Hoften, all mission specialists.
