SPACE SHUTTLE (STS-38/ATLANTIS)

STS-38 CREW INSIGNIA — The crewmembers of Space Shuttle Mission 36 (designated STS-38) have chosen this emblem as their official crew patch. The STS-38 patch was designed to represent and pay tribute to all the men and women who contribute to the Space Shuttle program. The top Orbiter, with the stylistic Orbital Maneuvering System burn, symbolizes the continuing dynamic nature of the shuttle program. The bottom Orbiter, a black and white mirror image, acknowledges the thousands of unheralded individuals who work behind the scenes in support of America's manned space program. Crewmembers for the STS-38 Department of Defense mission are astronauts Richard O. Covey, commander; Frank L. Culbertson, pilot; and mission specialists Robert C. Springer, Carl J. Meade and Charles D. Gemar.
