

Concord High School ✓

I enclose the letter composed by all the pupils in my class and three of their drawings. The children were all so impressed by the space shuttle programme they have done a lot of research work and made many pictures for display. Pictures of Challenger and the like were by far the most popular. I hope our thoughts will help to lessen your sadness and increase your pride in the pioneering work that still takes place.

Yours sincerely

C. Hadfield

(Class 1 - Teacher)

St. paul's cofE primary school

29th January 1986

Dear students of concord High School,
I am writing on behalf of st paul's cofE
Primary school. We would like to express
our great sympathy for what happened
to your teacher christa McAuliffe on
the space shuttle challenger. We were all
so very interested in the space programme
because we are doing a project on

Space. A boy in our class called Jason drew a very good picture of the Shuttle before the tragedy. I was watching television when I heard about the shuttle disaster. I was very shocked as I never thought the challenger would explode because it has been into space so many times and never had a fault. I would have liked your teacher to have succeeded in the space ship. I knew you were excited about her trip because I saw a film of you having a party. I imagine your teacher was very excited too.

Once again the whole class sends
their greatest sympathy
with love
