SPACE SHUTTLE (STS-132 / ATLANTIS)

Space Shuttle Atlantis with a crew of six astronauts on Mission STS-132 will deliver an Integrated Cargo Carrier and the Russian-built Mini Research Module (MRM-1), to the International Space Station (ISS). The flight will also deliver critical spare parts and cargo. In addition, Atlantis will deliver a new communications antenna along with a new set of batteries for one of the station's solar arrays. Three spacewalks are planned during the 12-day mission, the final scheduled flight of shuttle Atlantis, which will be the 34th flight to the orbiting station complex.

THE STS-132 CREW — Veteran shuttle astronaut, **Kenneth T. Ham**, will lead the Atlantis crew of STS-132. He has logged over 13 days in space as a shuttle pilot since his selection to the astronaut corps in 1998. Second-time space flier, **Dominic A. Antonelli**, chosen for the astronaut program in 2000, will be the shuttle pilot and undock Atlantis from the station at the end of the mission. The STS-132 mission specialists are: **Michael T. Good**, from the astronaut class of 2000, has logged 13 days in space and nearly 16 hours of spacewalk time during a shuttle flight in 2009. **Garrett E. Reisman**, chosen as an astronaut in 1998, spent a 3-month tour of duty aboard the ISS in 2008. He performed 1 spacewalk totaling 7 hours. **Piers J. Sellers**, an astronaut since 1996, has flown twice on the shuttle. He has logged over 559 hours in space, including 41 spacewalk hours. **Stephen G. Bowen**, from the astronaut class of 2000, logged nearly 16 days in space in 2008, including almost 20 hours of spacewalk time.

THE STS-132 CREW INSIGNIA — The STS-132 mission patch features Atlantis flying off into the sunset as the end of the shuttle program approaches. The sun is also heralding the promise of a new day as it rises for the first time on a new ISS module, the MRM-1, which is also named "Rassvet," the Russian word for dawn. The last names of the crew are depicted inside the circular border of the emblem.
