

Washington Feb 5 - 1841

Dear Clara

I saw a letter from Miss Maria
her father mentioning that Mr Genet was at Beech
hill and as soon as he left there she would come
to Beechhill, which I will be glad that she
or she certainly will be more at her ease there
than any where as soon as she arrives there I wish
to know it, that my letter to her may not
be miscarried to Longmire Creek - The weather here
is continually changeable from warm to cold and
from cold to warm that one is scarcely free from
a cold - altho I do not leave my room but attend Con-
greg every day yet I have a very bad cold -

I do not recollect that I have any thing parti-
cularly to mention Only that Billy must see that
the Hams are kept constantly under pickle and
when it is time, to hang them in the Smoke House
Do Clara be very careful of the Fires - I am quite
tired here and long to be at home, - Remember me
very affectionately at home - & to Old mopsy

Am your friend

C. S. Corbitt
