Hennyfield Oct 16 1840

My Dear Mr Hornor

SHR

We are all very much pleased with the addition; which certainly harmonizes admirably with the main building. would it admit of being enlarged to about 10 feet square, lengthening it in proportion? This would give better sized rooms. I am disposed to place the store room in the north west corner of the wash room, so as to give the latter the full benefit of the south window; which is important both in summer and winter. I find there is no need of an oven in the wash room; I find there is one in the kitchen range. nothing is necessary but an ordinary cooking

stove; one of which is and in the present
wash house. A flue or pipe can be
carried into the flue of the Kitchen
chimney across the space occupied
at present by the Kitchen stairs.

I am interrupted and must end
this off leaving further particulars to
a future letter. My present one is
merely to know whether the addition
ability of the enlargement I mention
without injuring the effect

Yours very truly

Washington Irving

Have stone enough quarried out.
I presume the stone ends are to
be rough hewn 8 feet below & 3 feet above
the ground. Six feet in all
