

Miss

Sept 21st 1843

My dear Sir

Your letter to me - of the 6th & 10th inst.

gave us all the greatest pain you had been desperately sick - among strangers - and in the extremest danger of your life - your ~~best~~ fine voice broken but you was very much relieved anxious to return to me and a long hard drive night and day and I have feared a relapse - all these things press upon us at all hours night & day We look of course with trembling anxiety for the arrival of the next steamer which will be here by the 18th most certainly - you will be still feeble for a long time I pray to cease taking medicine - let your exercise be regular and gradually increased restrain all your appetites but eating and that indulge that frequently but sparingly at first.

You had a strong constitution but the operation with Dr. Mendenhall & Uncle Phil has been very undecisive you to take frequent doses don't you ever forget me any. This illness may ruin you and I beg you as you value your health to throw away all your pills & other medicines you do not require them - Be particular in informing me how you are. I pray God to help and

to us - by the very speaking of concern for health
you have been informed as whether the Doc with
the saddle ~~was~~ can succeed. you ask me
to inform you of the progress of my enterprises
with the sailing. The Mutual Safety has
been employed with occasional enterprise from coast
of Spain & for 1 month to this time on the Bridgford
Route (and once entering by which she made \$1750) she
made on that Route I think 7000 in ten months under
very disadvantage. She is very slow and not in any
other respect an entering boat. which proves how
Indiscreet the arrangement made by George was -
The Enricha for which we paid 12000 will be
completed on the 15th inst. & probably commence on the same
route on the 17th. If she should be loaded with
is believed she will do a great business as they
will take the up as well as the down passengers &
freight so that Robert thinks she will make
20,000 a year. The cost of it is supposed
to be all about \$45,000. I am a little uncertain
what my interest in her is but I think it is
contemplation of the market expectation and
if that route is secured (operations can come
on progress to that end) to offer to take and
pay for on half of her and consequently to
receive on half of her profits which would
be for 8 to 10,000 a year - I will pay for this
half say \$23,000 either if I can see the purchase
either by a sale of my D L S R R Stock 600
at \$35 or by issuing a be assigned a mortgage
on this farm. The latter I would prefer as my
Stock will probably go up to 50 in a year

or two. However all this is very uncertain I know not what R L
Go. Bankers may be the only instrument would be the a danger
of so much ready to keep the alley in the eastern portion
between another project which I think we must succeed that
is to settle the affairs of the Pennsylvania R.R. by which we will
secure the Route and be paid 60000 in its stock with little
more but which will be bought up to 450 or 500 of an interest
To do this we have been under the necessity of opening up
debts (well secured but at 7% interest) to the amount
of \$45,000 - There are heavy liabilities - But which is
the point my easy State of the market we can manage
: agree - Should I get the good interest in the Enricha I
: intend to give much of my attention to her - I shall probably
go to Washington this winter to promote D L S Go interest and
also to keep the Chain of the Laps by Frank Spalding
house to 1800. at least as to the last I know
I shall be by some channels to go there to
attend to this business. Time will soon
settle all these matters. My concern

with the Congress which you have been concerned by the
: either in my favor was taken to the Court of Errors how the
been argued and will be decided in October
Robert Allen & Griffin think there is no doubt of my
success. The farm is doing well although the People
are not altogether satisfactory. The Proceeds are
: increasing & will increase - And will be as to
clothing groceries & traps living about altogether for the
produce - I am now deriving services continually
The 2 year old horse brother & male will be attended
this fall and we hope to drive the two full brothers
during the winter he is now in my care and is
a very serviceable horse. He is large but very un-
: gainly. The ^{yearling} foal is very fine. The last I think
of the three - We are all well but all
very anxious about you

God bless you dear son May I shut
the well find you in health
Your affectionate father J. L. H.
