Mr. W. H. Mersereau,

Dear Sir:-

The writer called at "Sunnyside" today and looked over the proposed changes and additions to the plumbing.

We do not see how it would be possible to set a bath tub in the shower room, as the fixtures and the radiator will take up more room than there is to spare. We studied the matter for some time without being able to find any plan that seemed at all feasible, unless the radiator was dispensed with, and that, of course was out of the question. There would be no trouble at all in setting a bath tub and basin in the small room adjoining Mrs. Irving's, and connecting same with the present waste, vent and supply pipes, and we estimate the cost at Two Hundred & Twelve Dollars; this includes a "Puritan" bath tub 5 ft., and an Italian marble lavatory, with slab 42 x 22 in.

The writer may be absent from home next week, but one of our plumbers went over the matter with us, and we shall be able to give any information desired. We did not attempt to figure the cost of alterations in the shower room, as we doubt if it may be done.

Yours truly,

C. H. Curtiss
