Mr. W. H. Mesereau,
32 Broadway,
New York, N. Y.

Dear Sir:-

At Mr. A. D. Irving's House Irvington, N. Y. the size of the hall fireplace is 4' 4" x 3' 0" and the library fireplace 4' 4" x 2' 10". The inside measurement of the tile flue is 6 1/2" x 11" which is not large enough for fireplaces of this size.

I propose to remove the tile flue linings and replace them with metal ones of sufficient size for the sum of One Hundred and Seventy Five Dollars each (\$175.00) each, with the understanding that the charges are to be void, should these flues not draw satisfactorily payment to be deferred until sufficiently tried.

In doing this work I would not mar any decorated walls, and would leave everything in the same good condition as I find it.

Truly yours,

John Whitley
